Company - L'entreprise

MOAB was born in the early eighties in Rome, in Via della Vaccheria di Gianni n ° 93. In 2005 it moved to the Province of Rome to its current location in Guidonia Montecelio.

In the mid-nineties, MOAB places Design at the center of the business project and the culture of the project as the key to the planning and implementation of its product offer.

Today MOAB is a metropolitan-style design company, elegant and precious, with transversal products, able to furnish not only the bathroom.

For almost thirty years MOAB has been introducing unusual materials to the bathroom world, such as concrete, cement mortars, metals, recycled woods, wired glasses and gel-coated fiberglass with exposed fibers, while maintaining style and identity.

The constant aesthetic and material research have allowed MOAB to propose an "Integrated Furniture System" made up of Collections (PLANE, BLOCK, DOOR, DRESSCODE, INDUSTRIAL LINE, LESS, MOR^e and ZERO20) and Products (D100, ELLE, ELLEDUE, ELLETRE, LVC, LVM, LVR, VVR), which allow you to create different, unique and personalized bathroom environments.

MOAB est née au début des années '90 à Rome, Via della Vaccheria di Gianni n ° 93. En 2005, elle a déménagé dans la Province de Rome, son siège actuel à Guidonia Montecelio.

Au milieu des années '90, MOAB place le Design au centre du projet d'entreprise et la culture du projet comme clé de la conception et de la mise en œuvre de son offre produit.

Aujourd'hui MOAB est une entreprise de design de style métropolitain, élégante et précieuse, avec des produits transversaux, capables de meubler non seulement la salle de bain.

Depuis près de trente ans, MOAB introduit dans l'univers de la salle de bains des matériaux insolites tels que le béton, les mortiers de ciment, les métaux, le bois recyclé, le verre armé et la fibre de verre gélifiée à fibres visibles, tout en conservant son style et identité.

La recherche esthétique et matérielle constante a permis à MOAB de proposer un "système de mobilier intégré" composé de collections (PLANE, BLOCK, DOOR, DRESSCODE, INDUSTRIAL LINE, LESS, MOR^e et ZERO20) et de produits (D100, ELLE, ELLEDUE, ELLETRE, LVC, LVM, LVR, VVR), qui permettent de créer des environnements de salle de bain différents, uniques et personnalisés.

Services - Les services

With a production structure capable of managing all phases of furniture design and construction, MOAB is a company which can provide - in addition to products - several services to support the operational activity of Distribution and the Project World.

In particular, through the interaction with the MOAB Design Studio, the company provides the following services:

Expo design

MOAB offers to the Distribution a service of design and implementation of exhibition proposals which are able to best express their product offer.

Bespoke

The MOAB is able to support the Distribution in the design and construction of bathroom furniture - chosen by its Private Clients - through a customizable and tailor-made product offer.

The bathroom design activity is offered by MOAB's internal staff to those distributors who have defined a "Partnership Agreement" with the company

Contract

MOAB offers to the Project World (Architects, Interior Designers, Developers and General Contractor), support in the planning and implementation phases of residential, hotel and management initiatives.

In addition to offering support in the design phase, MOAB is able to provide both catalogue products and solutions designed and created ad hoc for these initiatives.

Avec une structure de production capable de gérer toutes les phases de conception et de construction du meuble, MOAB est une entreprise capable de fournir - en plus des produits - une série de services pour soutenir l'activité opérationnelle de la Distribution et du Monde du Projet.

En particulier, à travers l'interaction avec le Cabinet MOAB, la société fournit les services suivants:

Conception d'exposition

MOAB propose à la Distribution un service de conception et de réalisation de propositions d'expositions capables d'exprimer au mieux leur offre produit.

"Atelier"

MOAB est en mesure d'accompagner la Distribution dans la conception et la réalisation de meubles de salle de bains - choisis par ses Clients Privés - à travers une offre de produits personnalisables et sur-mesure.

L'activité de conception de salle de bains est proposée par le personnel interne de MOAB aux distributeurs qui ont défini un "accord de partenariat" avec l'entreprise

Contract

MOAB offre au Monde du Projet (architectes, décorateurs d'intérieur, promoteurs et entrepreneur général) un soutien dans les phases de planification et de mise en œuvre d'initiatives résidentielles, hôtelières et de gestion.

En plus d'offrir un soutien dans la phase de conception, MOAB est en mesure de fournir à la fois des produits de catalogue et des solutions conçues et créées ad hoc pour ces initiatives.

Moab materials - Les Matériaux Moab

Always careful with environmental issues, the MOAB product offer is made with materials which are the basis of the “new paradigm of the circular economy”, such as:

Prefinito Cemento and Prefinito Calce, are eco-mortars with a cement and lime effect, which are applied through an artisanal and exclusive process developed by Moab and constantly improved since 2003, the year in which production began. The composition is free of epoxy resins and substances harmful to humans and the environment, and the product resistance to wear and water are excellent.

Concrete, used by pouring into a mould, is added with natural stone powders in order to increase its compactness and performance in use.

Metals, such as steel, aluminium, brass and copper, in the painted, brushed or burnished versions. The burnishing of the metals is obtained through an artisanal process that makes each piece unique and does not allow a uniformity of colour and chiaroscuro.

Special woods: Teak and Re-used represent the historical offer of the company which, since 2011, has been offering fine woods with a special manufacturing of strips and recycled woods.

- **Teak Burma**, among the teak species, is the most valuable and appreciated for its resistance to humidity and water. Teak Burma and the special manufacturing used by Moab, give life - in the case of the DOOR Collection - to a product with an exclusive and precious design: “Teak stripes”.
- **“Re-used wood”** is a wood made with those woods that have reached the end of their life cycle and are recycled, stabilized and treated. In this way Moab offers these woods the possibility of “having a new life” by creating unique and unrepeatable products. Although a selection is made at the origin, it is not possible to predict how each piece will be, both for the grain and for the imperfections caused by time and the original use of the wood.

In addition to the special woods, Moab product offer includes seven additional types of composite, certified and environmentally sustainable Woods. These woods allow, during the production of the furniture, the control and homogeneity of the selected colours and veins.

Fiberglass, a material made up of glass fiber and a plastic resin based on vinyl polyester and thermosetting polymers. In combination with the Gel-coat it has been used for years to produce the hull of boats and the bodywork of cars.

Betacryl® is a Solid Surface manufactured approximately two thirds with aluminium hydroxide and one third with acrylic resin and natural colouring pigments. The aluminium hydroxide gives the product excellent mechanical resistance, while the acrylic resin guarantees hygiene, impermeability and colour stability over time. Despite having a consistency similar to the stone, Betacryl® is restorable, is easy to be maintained and allows Moab to carry out industrial productions with artisanal manufacturing.

Micro Textured Lacquer (LMT) is made using a special polyurethane-based paint with Teflon microspheres that give it a slightly satin look. The micro-textured lacquer is more scratch and water resistant rather than normal matt lacquers, therefore it is suitable for application on countertop and undermount washbasins.

3D Micro Textured Lacquer (LMT3D) is a special processing of the MDF doors and drawer fronts which, before being lacquered by LMT paint, undergo a “three-dimensional” process that creates elegant vertical grooves.

Acid etched glasses, 12 mm thick, have an acid etched finish, easy to be maintained, which turn out to be elegant and silky to the touch. Available enamelled in 8 colours, they can have an integrated thermoformed washbasin. After thermoforming, all sink tops undergo a severe out-of-mould annealing process to eliminate all residual tension stresses and guarantee very high resistance standards.

Moab materials - Les Matériaux Moab

Toujours à l'écoute des enjeux environnementaux, l'offre produit MOAB est réalisée avec des matériaux qui sont à la base du « nouveau paradigme de l'économie circulaire », tels que :

“Le **Prefinito Cemento** et **Prefinito Calce**” sont des éco-mortiers à effet ciment et chaux, qui sont appliqués selon un procédé artisanal et exclusif développé par Moab et constamment amélioré depuis 2003, année du début de la production. La composition est exempte de résines époxydes et de substances nocives pour l'homme et l'environnement, et la résistance du produit à l'usure et à l'eau est excellente.

Le **Béton**, utilisé par coulage dans un moule, est additionné de poudres de pierre naturelle afin d'augmenter sa compacité et ses performances à l'usage ;

Les **Métaux**, tels que l'acier, l'aluminium, le laiton et le cuivre, dans les versions peintes, brossées ou brunies. Le brunissage des métaux est obtenu par un procédé artisanal qui rend chaque pièce unique et ne permet pas une uniformité de couleur et de clair-obscur ;

Les Bois spéciaux: le Teck et le Bois de Récupération représentent l'offre historique de l'entreprise qui, depuis 2011, propose des bois nobles avec une fabrication spéciale de listels et de bois récupérés.

- **Le Teck de Birmanie**, parmi les essences de teck, est le plus précieux et apprécié pour sa résistance à l'humidité et à l'eau. Le teck Burma et la fabrication spéciale utilisée par Moab, donnent vie - dans le cas de la collection DOOR - à un produit au design exclusif et précieux ;
- **Le Bois de Récupération**, est composé de bois en fin de vie recyclés, stabilisés et traités. De cette façon, Moab offre à ces bois la possibilité “d'avoir une nouvelle vie” en créant des produits uniques et irremplaçables. Bien qu'une sélection soit faite à l'origine, il n'est pas possible de prédire comment sera chaque pièce, tant pour le grain que pour les imperfections causées par le temps et l'utilisation originale du bois.

En plus des bois spéciaux, l'offre de produits Moab comprend sept autres types de bois composites, certifiés et écologiques. Ces bois permettent, lors de la fabrication du meuble, le contrôle et l'homogénéité des coloris et veines choisis.

La Fibre de verre, matériau composé de fibre de verre et d'une résine plastique à base de polyester vinylique et de polymères thermodurcissables. En combinaison avec le Gel-coat, il est utilisé depuis des années pour produire la coque des bateaux et la carrosserie des voitures.

Le Betacryl® est un Solid Surface fabriqué aux deux tiers environ avec de l'hydroxyde d'aluminium et un tiers avec de la résine acrylique et des pigments colorants naturels. L'hydroxyde d'aluminium confère au produit une excellente résistance mécanique, tandis que la résine acrylique garantit l'hygiène, l'imperméabilité et la stabilité des couleurs dans le temps. Malgré une consistance proche de la pierre, le Betacryl® est restaurable, facile d'entretien et permet à Moab de réaliser des productions industrielles avec une fabrication artisanale.

La **Laque Micro-Texturée (LMT)** est fabriquée à l'aide d'une peinture spéciale à base de polyuréthane avec des microsphères de Téflon qui lui donnent une finition légèrement satinée. La laque micro-texturée a une résistance aux rayures et à l'eau supérieure à celle des laques mates normales, elle convient donc à une application sur des lavabos à poser et sous plan.

La **Laque Micro-Texturée 3D (LMT3D)** est un traitement spécial des portes et des façades de tiroirs en MDF qui, avant d'être laquées avec la peinture LMT, subissent un processus “tridimensionnel” qui crée d'élégantes rainures verticales

Les **Verres traités à l'Acide**, d'une épaisseur de 12 mm, ont une finition dépolie à l'acide, facile d'entretien, élégante et soyeuse au toucher.

Disponibles émaillés en 8 couleurs, ils peuvent avoir une vasque intégrée thermoformée. Après le thermoformage, tous les tops avec les vasques intégrées subissent un processus de recuit hors moule sévère pour éliminer toutes les contraintes de tension résiduelles et garantir des normes de résistance très élevées.

TOP Plane

The main feature of the Tops of the Plane Collection is the strong dimensional and material customization.

Indeed, they can be ordered to the centimeter and are available in 2 types:

- suspended top Plane h6 cm for countertop washbasins;
- suspended top Plane h14 cm for undermount and / or countertop washbasins;

The suspended tops of the Plane line are available in:

- LMT – Lacquered Micro Textured, consist of marine plywood panels lacquered with a special paint containing Teflon microspheres that give the surface a slightly satin finish as well as high resistance to water and scratches (see sheet on page 4);
- Betacryl®, are made up of glued and hand finished slabs. A wide range of undermount washbasins in the same material can be combined with the top. This allows to create a highly resistant and easy-to-clean single-material top (see sheet on page 4);
- Prefinito Calce and Cemento, they consist of marine plywood panels on which a lime or cement effect cementitious resin is applied - by hand and with an artisanal procedure - which gives the top a textured and seamless appearance. The finish, consisting of 6 total layers of primer, mortar and protective layers, gives the top a remarkable resistance to water and scratches (see sheet on page 4);

La caractéristique principale des Tops de la Collection Plane est la forte personnalisation dimensionnelle et matérielle.

En fait, ils peuvent être commandés au centimètre et sont disponibles en 2 types:

- *top suspendu h6 cm pour les vasques à poser;*
- *top suspendu h14 cm pour les vasques à poser et ou dessous du plan;*

Les tops suspendus de la série Plane sont disponibles en:

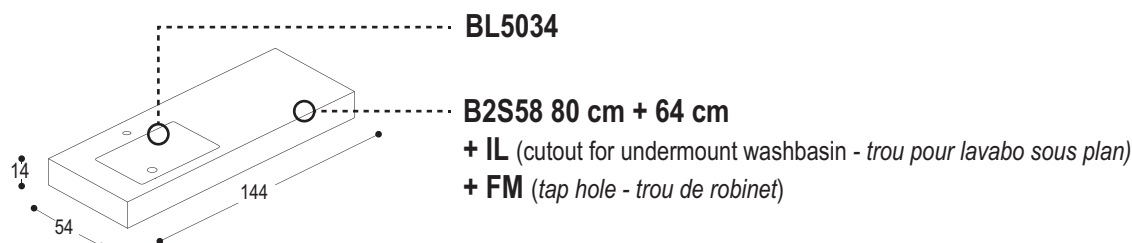

- *LMT – Laqué Micro-Texturé ils sont composés de panneaux de contreplaqué marine laqués avec une peinture spéciale contenant des microsphères de Téflon qui confèrent à la surface une finition légèrement satinée ainsi qu'une haute résistance à l'eau et aux rayures (voir fiche à la page 4);*
- *Betacryl, ils sont composés de dalles collées et finies à la main. Le plan peut être combiné avec une large gamme de lavabos dessous du plan dans le même matériau. Cela permet de créer un plateau mono-matière très résistant et facile à nettoyer (voir fiche à la page 4);*
- *Prefinito Calce et Cemento, ils sont constitués de panneaux de contreplaqué marin sur lesquels une résine ciment effet chaux ou ciment est appliquée - à la main et selon un procédé artisanal - qui donne au plateau un aspect texturé et sans joint. La finition, composée au total de 6 couches d'apprêt, mortier et agents de protection, confère au plateau une remarquable résistance à l'eau et aux rayures (voir fiche à la page 4);*

TOP Industrial Line

Industrial Line is a collection made up of tops in re-used wood, expanded metal or wired glass and countertop washbasins in painted steel.

The Tops of the Industrial Line Collection are available in different sizes and materials, in particular:

- Framed Glass & Framed Metal, h2.5 cm suspended top for countertop washbasins in the wired glass version or in the expanded metal version.
- Plank, h4.5 cm suspended top for countertop washbasins is available in "re-used" wood;
- Belt, suspended top h8 cm for countertop washbasins is available in "re-used" wood and in Prefinito Calce and Cemento. A painted or brushed stainless steel frame enriches the top;

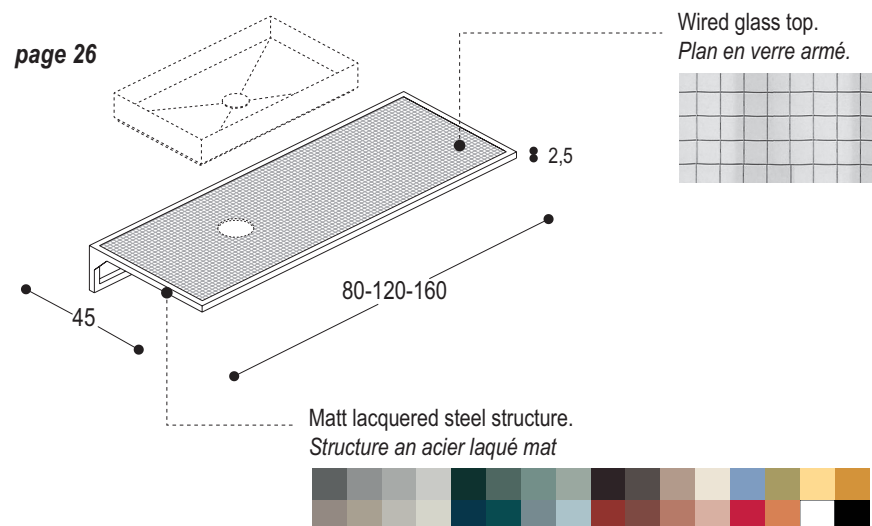

Industrial Line est une collection composée de plans en bois de récupération, de métal déployé ou de verre armé et de vasques à poser en acier peint.

Les Tops de la collection Industrial Line sont disponibles en différentes tailles et matériaux, en particulier:

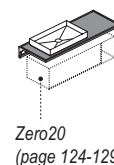

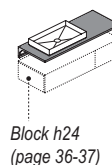

- *Belt, plan suspendu h8 cm pour vasques à poser est disponible en bois « de récupération » et en préfini à la chaux ou au ciment. Une armature peinte ou balayée d'acier inoxydable enrichit le top;*
- *Plank, top suspendu h4,5 cm pour les vasques à poser est disponible en bois de récupération ;*
- *Frame Glass & Metal, top suspendu h2,5 cm pour les vasques à poser dans la version verre armé ou en métal déployé*

Framed Glass

Block h24

Block is a Collection made up of Cabinets h48 and h24, whose main feature is the strong dimensional and material customization.

The Cabinet is made up of modular bases and covering surfaces made of different materials with the possibility of inserting undermount, integrated washbasins – in acid etched glass and Betacryl® - and countertop.

The finishes are extended with the new range of warm and cold woods and with the version in 3D Lacquered Micro-Texturized; a special processing of the doors and drawer fronts in MDF which, before being lacquered with LMT paint, undergo a “three-dimensional” process that creates elegant vertical grooves.

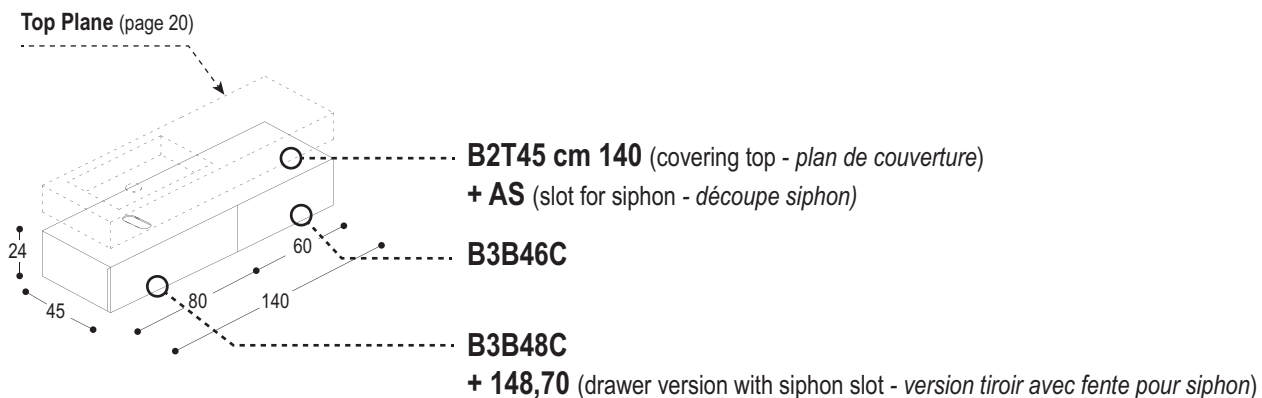

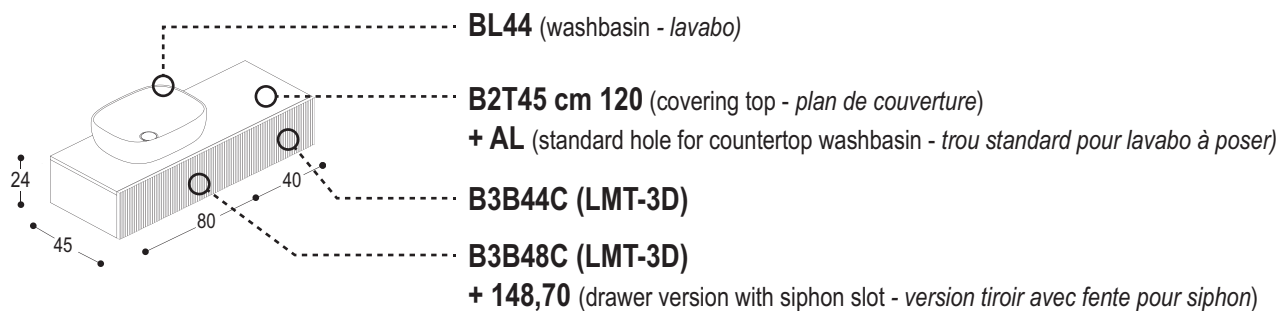

The wide range of handcrafted finishes in Prefinito Cemento and Prefinito Calce remains (20 in total) that are applied to the entire piece of furniture. The finish consists of 6 total layers of primer, mortar and protective layers, which in addition to giving a unique and handcrafted appearance gives the product considerable resistance to water and scratches.

Block est une Collection composée de Meubles de Rangement h48 ou h24, dont la principale caractéristique est la forte personnalisation dimensionnelle et matérielle. Le meuble de rangement est composé de bases modulaires et de plans de couverture en différents matériaux avec la possibilité d'insérer des lavabos dessous du plan, intégrés - en verre acidé et Betacryl® - et à poser.

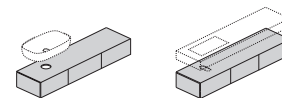

Les finitions sont étendues avec la nouvelle gamme de bois chauds et froids et avec la version en laque 3D micro-texturée ; un traitement spécial des portes et des façades de tiroirs en MDF qui, avant d'être laquées avec de la peinture LMT, subissent un processus "tridimensionnel" qui crée d'élégantes rainures verticales.

La large gamme de finitions artisanales en "Prefinito Cemento et Prefinito Calce" reste unique en son genre; (20 au total) elles sont appliquées à l'ensemble du meuble. La finition se compose de 6 couches totales d'apprêt, de mortier et de couches de protection qui, en plus de donner un aspect unique et artisanal, confèrent au produit une résistance considérable à l'eau et aux rayures.

Block h48

Block è una Collezione composta da Mobili Contenitori h48 e h24, la cui principale caratteristica è la forte personalizzazione sia dimensionale che materica. Il Mobile Contenitore è costituito da basi componibili e da piani di copertura realizzati in materiali diversi con possibilità di inserire Lavabi sotto piano, integrati - in vetro acidato e Betacryl® - e da appoggio.

Le finiture si ampliano con la nuova gamma di legni caldi e freddi e con la versione in Laccato Micro-Texturizzato 3D; una speciale lavorazione delle ante e dei frontali dei cassetti in MDF che, prima di essere laccati con la vernice LMT, subiscono una lavorazione "tridimensionale" che crea eleganti scanalature verticali.

Unica nel suo genere rimane la vasta gamma di finiture artigianali in Prefinito Cemento e Prefinito Calce (20 in totale) che vengono applicate sull'intero mobile.

La finitura è costituita da 6 strati totali tra fondo, malte e protettivi, che oltre a dare un aspetto unico ed artigianale conferisce al manufatto una notevole resistenza all'acqua ed ai graffi.

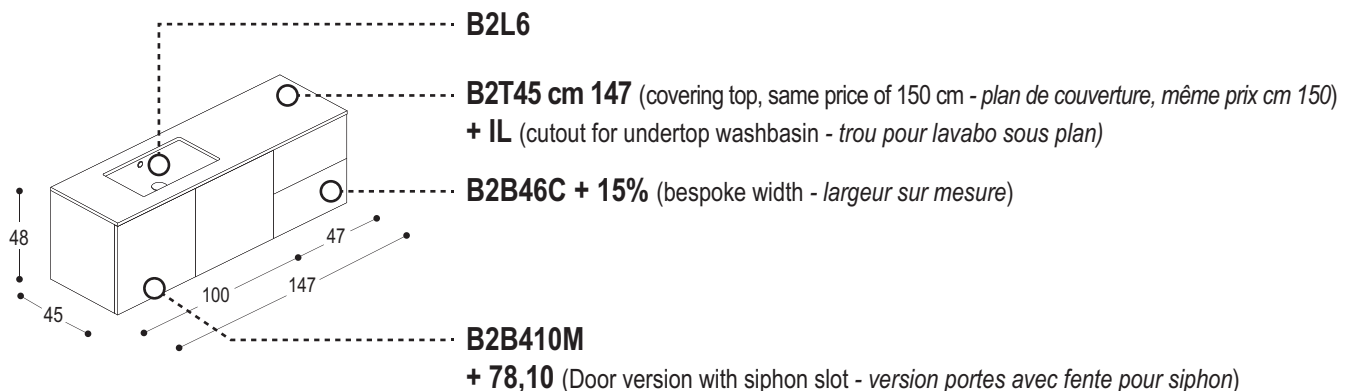

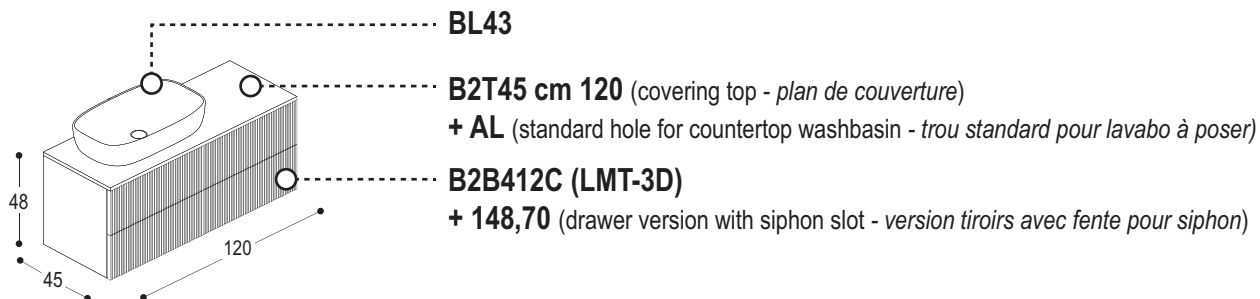

Block is a Collection made up of Cabinets h48 and h24, whose main feature is the strong dimensional and material customization.

The Cabinet is made up of modular bases and covering surfaces made of different materials with the possibility of inserting undermount, integrated washbasins – in acid etched glass and Betacryl® - and countertop.

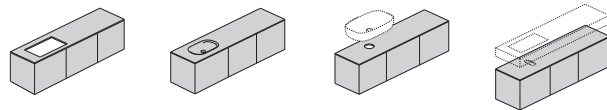

The finishes are extended with the new range of warm and cold woods and with the version in 3D Lacquered Micro-Texturized; a special processing of the doors and drawer fronts in MDF which, before being lacquered with LMT paint, undergo a "three-dimensional" process that creates elegant vertical grooves.

The wide range of handcrafted finishes in Prefinito Cemento and Prefinito Calce remains (20 in total) that are applied to the entire piece of furniture. The finish consists of 6 total layers of primer, mortar and protective layers, which in addition to giving a unique and handcrafted appearance gives the product considerable resistance to water and scratches.

Door

Proposed to the public more than ten years ago, Door is a Collection made up of Cabinets, available in different sizes.

Door furniture collection presents the expressiveness of wood as the absolute protagonist.

The Cabinets consists of modular bases and cover surfaces made of different materials and integrated, undermount – in acid etched glass and Betacryl® - and countertop washbasins.

Characteristic of this collection are the doors and the fronts of the drawers which can be in solid teak with vertical grooves or in “re-used” wood, recovered and stabilized.

Very different types of wood, but both the result of a special craftsmanship that gives life to unique pieces.

Proposée au public il y a plus de dix ans, Door est une Collection composée de Meubles de Rangement, disponibles en différentes mesures.

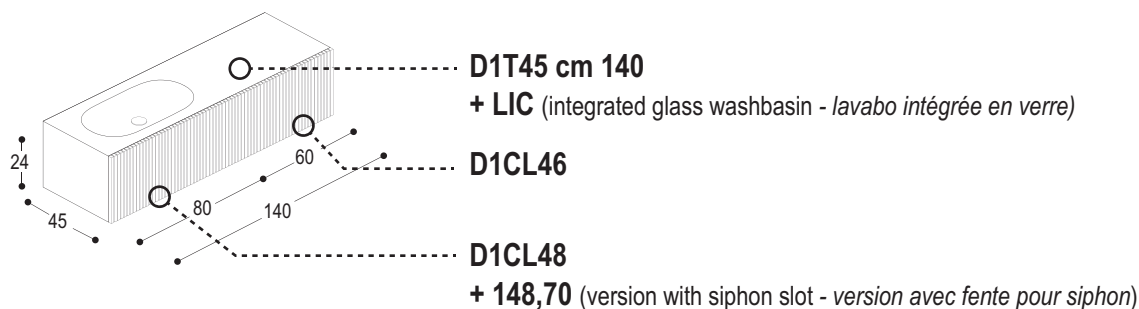

La collection de meubles Door présente l'expressivité du bois comme protagoniste absolu.

Le Meuble de Rangement se compose de bases modulaires et de plans de couverture en différents matériaux et de lavabos, sous du plans, intégrés - en verre acidé et Betacryl® - et à poser.

Caractéristique de cette collection sont les portes et les façades des tiroirs qui peuvent être en teck massif avec rainures verticales ou en bois « de récupération », récupéré et stabilisé.

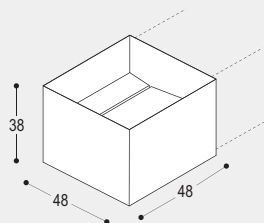

Des essences de bois très différentes, mais les deux sont le résultat d'un savoir-faire particulier qui donne vie à des pièces uniques.

Door "Teak Stripes"- p.45

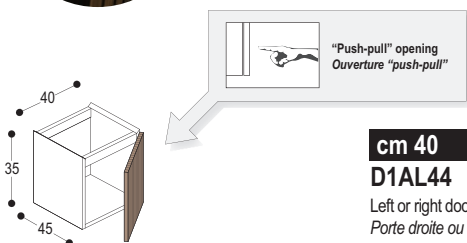

"Teak stripes" 45 cm deep vanity cabinets without covering top (cov. tops on page 54-55)
Meubles "Teak stripes" profondeur 45 cm sans plan de couverture (pour plans voir page 54-55)

The "teak stripes" doors and drawer fronts consist of a reinforced MDF interior covered with a solid teak with vertical grooves on the front and on the edges. Although a selection of teak blocks is made, uniformity of grain cannot be guaranteed.

Les portes et les façades des tiroirs "teak stripes" sont constituées d'un intérieur en MDF renforcé recouvert d'un teck massif avec des rainures verticales en façade et sur les bords. Bien qu'une sélection de blocs de teck soit faite, l'uniformité de la veinure ne peut pas être garantie

As reused wood is not possible to guarantee uniformity of doors and drawers both for grain and for surface imperfections due to the use and time.
Ce sont des bois recyclés. Tant pour les veinures que pour les imperfections causées par le temps, il n'est pas possible de garantir l'uniformité de l'approvisionnement.

Door "Teak Stripes"- p.54

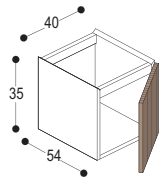

"Teak stripes" 54 cm deep vanity cabinets without covering top (cov. tops on page 58-59)
Meubles "Teak stripes" profondeur 54 cm sans plan de couverture (puor plans voir page 58-59)

The "teak stripes" doors and drawer fronts consist of a reinforced MDF interior covered with a solid teak with vertical grooves on the front and on the edges. Although a selection of teak blocks is made, uniformity of grain cannot be guaranteed.

Les portes et les façades des tiroirs "teak stripes" sont constituées d'un intérieur en MDF renforcé recouvert d'un teck massif avec des rainures verticales en façade et sur les bords. Bien qu'une sélection de blocs de teck soit faite, l'uniformité de la veinure ne peut pas être garantie

As reused wood is not possible to guarantee uniformity of doors and drawers both for grain and for surface imperfections due to the use and time.
Ce sont des bois recyclés. Tant pour les veinures que pour les imperfections causées par le temps, il n'est pas possible de garantir l'uniformité de l'approvisionnement.

Dresscode - p.50

Dresscode is a Collection consisting of Cabinets, available in different sizes and finishes, in which the large volume is lightened and enriched by a “three-centimeter central groove that runs on the sides” without interruption.

It is available lacquered, in the 32 colours of the Moab range, in brushed steel, brass and burnished copper, thus making the different variations of the furniture infinite. The finishes are expanded with a new range of warm and cold woods with the grain that runs horizontally seamlessly from side to side, and 32 colours in the Lacquered Micro-Textured version.

The only one of its kind remains the wide range of handcrafted finishes in Prefinito Cemento and Prefinito Calce (20 in total) that are applied to the entire piece of furniture. The finish consists of 6 total layers of primer, mortar and protective layers, which in addition to giving a unique and handcrafted appearance gives the product considerable resistance to water and scratches.

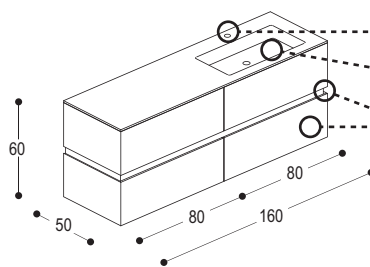

Dresscode est une collection composée de Meubles de Rangement, disponibles en différentes mesures et finitions, dans lesquelles le grand volume est allégé et enrichi par une “rainure centrale de trois centimètres qui court sur les côtés” sans interruption.

Il est disponible laqué, dans les 32 couleurs de la gamme Moab, en acier brossé, laiton et cuivre bruni, rendant ainsi les différentes déclinaisons du meuble infinies.

Les finitions s’enrichissent d’une nouvelle gamme de bois chauds et froids dont le grain s’étend horizontalement de part en part et de 32 couleurs dans la version Laqué Micro-Texturé.

Unique en son genre reste la large gamme de finitions artisanales en “Prefinito Cemento et Calce” (20 au total) qui sont appliquées à l’ensemble du meuble. La finition se compose de 6 couches totales d’apprêt, de mortier et de couches de protection qui, en plus de donner un aspect unique et artisanal, confèrent au produit une résistance considérable à l’eau et aux rayures.

Less is a Collection that consists of Washbasins in painted steel or Betacryl® and Cabinets that can be made with door or with door and drawer. It is available in two new types of wood (with continuous veining from the side to the front) for a warm and elegant piece of furniture, or in the finishes in Prefinito Cemento and Prefinito Calce, for a material and handcrafted feeling. Also available in the Lacquered Micro-Textured version, in 32 colours with a slightly satin surface.

Less est une Collection qui se compose de Lavabos en acier peint ou Betacryl® et de Meubles de Rangement qui peuvent être réalisées avec porte ou avec porte et tiroir. Il est disponible en deux nouvelles essences de bois (avec veinage continu du côté vers l'avant) pour un meuble chaleureux et élégant, ou dans les finitions en « Prefinito Cemento et Calce » pour une sensation de matière et d'artisanat. Également disponible dans la version Laqué Micro-Texturé, en 32 couleurs avec une surface légèrement satinée.

Mor^e - p.50

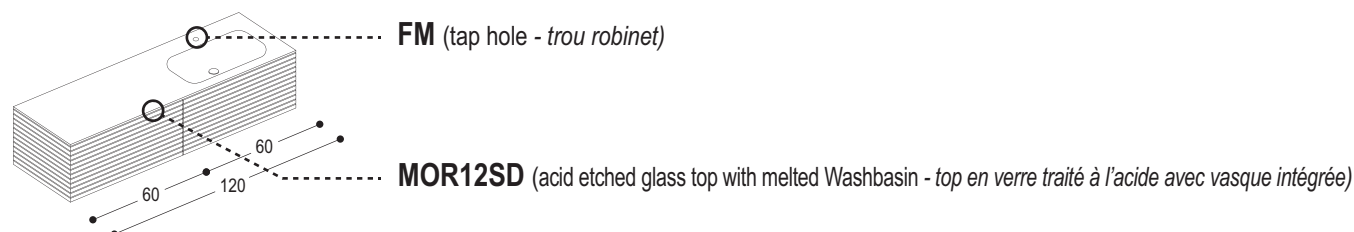

Mor^e is a Collection composed of Cabinets characterized by a strong personality given by the “horizontal scan” of the lines that surround it, without interruption, from side to side, creating an elegant play of shadows.

It is available in two new types of wood (with continuous veining from the side to the front) and in the Lacquered Micro-Textured version, with a slightly satin finish. It can be made with covering surfaces of different materials with countertop and integrated washbasins in Betacryl[®] and acid etched glass.

Mor^e est une collection composée de Meubles de Rangement caractérisés par une forte personnalité donnée par le “balayage horizontal” des lignes qui l’entourent, sans interruption, d’un côté à l’autre, créant un élégant jeu d’ombres.

Il est disponible en deux nouvelles essences de bois (à veinure continue latéralement vers l’avant) et dans la version Laqué Micro-Texturé, avec une finition légèrement satinée. Il peut être réalisé avec des plans de couverture de différents matériaux avec des vasques à poser, dessous du plan et des lavabos intégrés en Betacryl[®] et en verre acidé.

Étagère en bois "re-used" (de récupération) pour lavabo ILA100

255,70⁽²⁾

Info

⁽¹⁾**Warning:** the raw stainless steel washbasin has particularly visible welds and an unfinished surface that might show some signs.

⁽¹⁾**Attention:** le lavabo en acier brut présente des soudures particulièrement visibles et une surface pas finie qui pourrait présenter des signes.

⁽²⁾**Warning:** "Re-used" wood refers to recycled, stabilized and treated real woods. Although a selection is made at the origin, it is impossible to predict how each piece will be, both for the veining and for the imperfections caused by time and use, therefore they are not contestable.

⁽²⁾**Attention:** Le bois de récupération se réfère aux vrais bois recyclés, stabilisés et traités. Bien qu'une sélection soit faite à l'origine, il est impossible de prévoir comment sera chaque pièce, tant pour le grain que pour les imperfections causées par le temps et l'usage, elles ne sont donc pas contestables.

L2L

Countertop channel shaped concrete washbasin. Upon request with tap hole.
WARNING: please check the capacity of the countertop due to the remarkable washbasin's weight (75,5 kg).
Please be informed that the washbasin has a visible non-removable cavity in the back side that allows to fit the supporting frame for wall-mounted installation.

Lavabo à poser en béton sans trou robinet (sur demande avec trou pour le robinet).
ATTENTION: vérifiez étanchéité en tenant compte du poids du lavabo (75,5 kg).
Gardez à l'esprit que l'évier à l'arrière a une cavité inébranlable visible pour le monter sur un support special, dans la version suspendue.

Shower screens - Parois de douche

How to measure a shower enclosure

Comment prendre les mesures de la cabine de douche

Survey sizes have to be always made once the shower tray is installed; flooring and coatings must be completed. For a perfect installation, the shower tray has to be levelled and perfectly flat, otherwise the water sealing of the enclosure can't be ensured. If there is no shower tray or this is at floor level surface, please inform the company about the real size of the shower enclosure completed.

Les relevés des mesures doivent toujours être effectués une fois le receveur de douche installé avec sols et revêtements achevés. Pour une installation selon les règles de l'art il est indispensable que le receveur de douche soit correctement posé et qu'il soit par conséquent parfaitement plat, en cas contraire il n'est pas possible de garantir l'étanchéité de la cabine de douche. À défaut de receveur de douche, ou dans le cas de receveur de douche au ras du sol, communiquer à l'entreprise les mesures effectives de la cabine achevée.

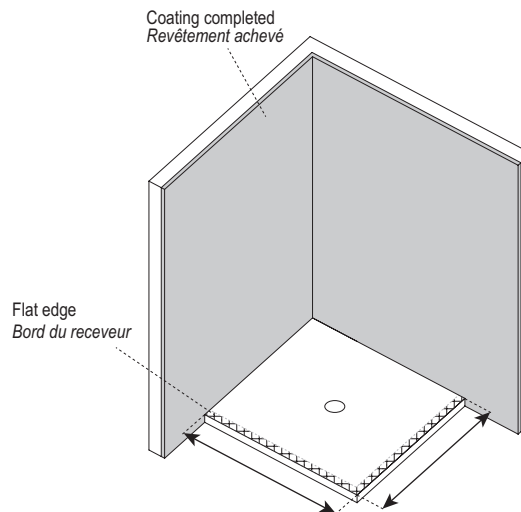

Niche - Niche

Size the niche with coating completed in three points: at the height of 0 / 100 / 200 cm.

Mesurer la niche une fois le revêtement achevé sur trois points : hauteur 0 / 100 / 200 cm.

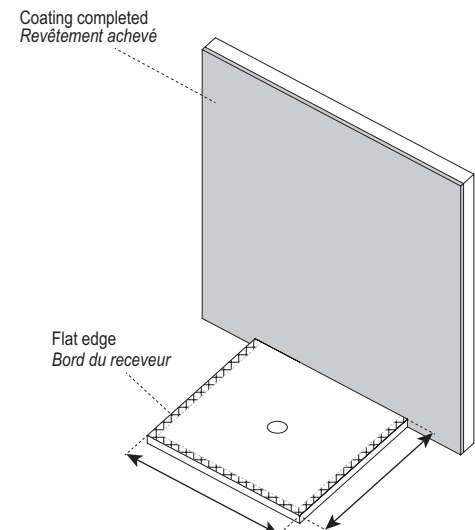

Corner - Angle

Size of the shower tray with coating completed.

Mesurer le receveur une fois le revêtement achevé.

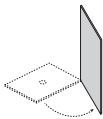

Wall - Mur

Size of the shower tray with coating completed.

Mesurer le receveur une fois le revêtement achevé.

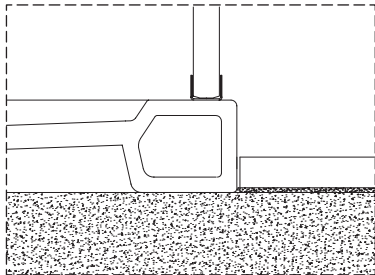

Shower screens - Parois de douche

Type of installation Typologie d'installation

Once flooring and coating have been completed, take the size of the installed shower tray from the wall up to the outside edge of the shower tray. When ordering, the customer must specify which kind of installation you will be required. When not specified, the company will consider this to be a standard freestanding installation shower tray. If preferred the custome can also specify the real size of the shower enclosure completed, regardless of the shower tray or floor where the cabin will be installed.

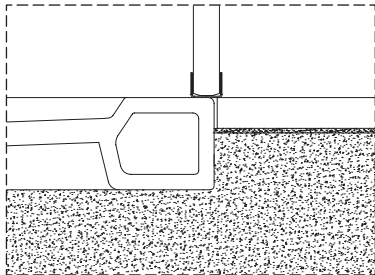

Une fois les sols et les revêtements achevés, relever les mesures du receveur de douche installé, depuis la cloison jusqu'au bord extérieur du receveur de douche. Indiquer au moment de la commande quelle typologie d'installation sera mise en oeuvre. À défaut d'indication on prendra en considération un receveur de douche standard installé autoportant. Sur demande il est possible en tout cas d'indiquer la mesure réelle effective de la cabine achevée indépendamment du receveur ou de la structure sur laquelle la cabine sera installée.

1) Floor-standing shower enclosure 1) Receveur de douche autoportant

Shower enclosures of less size than the shower tray. Crystals rest on the edge of the tray and their position depends on the model of the chosen cabin.

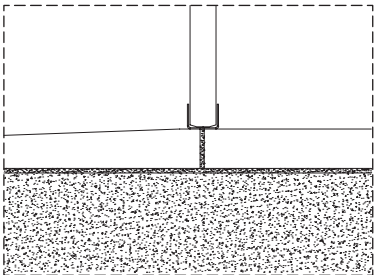

Cabine douche de mesure inférieure par rapport au receveur, les verres de sécurité s'appuient sur le bord du receveur de douche, leur position sur le bord du receveur dépend du modèle choisi.

2) Floor flush shower tray 2) Receveur de douche au ras du sol

Box doccia più grande o di uguale misura rispetto alle dimensioni del piatto, poiché l'installazione va eseguita sulla fuga tra pavimento e piatto o all'esterno dello stesso.

Shower enclosures of more or same size than the tray respect to the specified sizes of the tray, as installation is made at the gap between the floor and the tray or outside the latter.

3) Without the shower tray 3) Sans receveur de douche

The cabin will be placed directly on the floor and will be manufactured according to the sizes specified in the order.

La cabine sera positionnée directement sur le sol et sera réalisée suivant les mesures communiquées lors de la commande.

General sales conditions

THE CONDITIONS INDICATED HEREIN ARE APPLIED TO ALL CONTRACTS AND ARE INTENDED TO BE KNOWN AND ACCEPTED BY THE PURCHASER IN THE TRANSMISSION OF THE ORDER

ORDERS:

The orders are considered accepted, without the possibility of cancellation or modification, within one day from the receipt of the order confirmation.

LEAD-TIME:

Delivery terms must be calculated starting from the order confirmation. They will have only an indicative value and any delays will not allow the cancellation of orders, late payments, the return of materials or the damage compensation.

RISKS AND CLAIMS:

Even if the goods are carriage-free, the goods travel at the customer's own risk. The consignee must check the content of the packages at the time of delivery. If the goods are broken or incomplete, the appropriate reports must be done directly to the carrier and noted on the transport documents. Any subsequent disputes will not be accepted.

WARRANTY:

The products have a 2-year guarantee only if installed as indicated by Moab80 houselab S.r.l. and if the clients correctly carry out the maintenance and use operations indicated in the "Use and Maintenance" manual.

TOLERANCE:

All items may have a tolerance of +/- 2 mm with respect to the size ordered. The products may undergo colour changes over time due to use and exposure to light. In case of completion of orders, replacements or revisions made at a later time, any differences in tone will not be subject to dispute.

PRODUCT MODIFICATIONS:

Moab80 houselab S.r.l. reserves the right to make production or technical changes to its models, which may be necessary, without any prior notice.

PAYMENTS AND INTERESTS:

In the event of default or delay in payments, the deliveries of orders in progress will be automatically suspended. Interest on arrears will also be charged to the extent indicated by Legislative Decree No. 231/02.

ACCEPTATION AND COMPETENT COURT:

With the acceptance of the goods and the signing of the relevant delivery note, our general sales conditions of are understood as unconditionally accepted. Any contrary agreement is null; for any controversy the court of Rome is competent.

FREIGHT:

The freight will be defined according to the area and will be indicated in the quote and in the order confirmation.

N.B. The marble and glass top check must be carried out upon delivery. Reservations or complaints must be written down in our delivery note. ANY SUBSEQUENT CLAIM WILL NOT BE TAKEN INTO CONSIDERATION.

Conditions générales de vente

LES CONDITIONS INDIQUÉES S'APPLIQUENT À TOUS LES CONTRATS ET SONT DESTINÉES À ÊTRE CONNUES ET ACCEPTÉES PAR L'ACHETEUR LORS DE LA TRANSMISSION DE LA COMMANDE

COMMANDES:

Les commandes sont réputées acceptées, sans possibilité d'annulation ou de modification, dans un délai d'un jour à compter de la réception de la confirmation de commande.

DÉLAIS DE LIVRAISON:

Delivery terms must be calculated starting from the order confirmation. They will have only an indicative value and any delays will not allow the cancellation of orders, late payments, the return of materials or the damage compensation.

RISQUES ET RÉCLAMATIONS:

La marchandise voyage aux risques et périls du client. Le destinataire doit vérifier le contenu des colis au moment de la livraison. Si la marchandise est cassée ou incomplète, les procès-verbaux appropriés doivent être adressés directement au transporteur au moment de la livraison et notés sur les documents de transport. Toute contestation ultérieure ne sera pas acceptée.

GARANTIE:

Les produits ont une garantie de 2 ans seulement s'ils sont installés comme indiqué par Moab80 houselab S.r.l. et si vous effectuez correctement les opérations d'entretien et d'utilisation indiquées dans le manuel "Utilisation et entretien".

TOLÉRANCE:

Tous les articles peuvent avoir une tolérance de plus ou moins 2 mm par rapport à la taille commandée. Les produits peuvent subir des changements de couleur au fil du temps en raison de l'utilisation et de l'exposition à la lumière. En cas d'achèvement des commandes, de remplacements ou de révisions effectuées ensuite, les éventuelles différences de teintes ne pourront pas être contestées.

CHANGEMENTS:

Moab80 houselab S.r.l. se réserve le droit d'apporter à ses modèles les modifications de production ou techniques qui s'avèreraient nécessaires, sans préavis.

PAIEMENTS ET INTÉRÊTS:

En cas de défaut ou de retard de paiement, les livraisons des commandes en cours seront automatiquement suspendues. Des intérêts de retard seront également facturés dans la mesure indiquée par le décret législatif n° 231/02.

ACCEPTATION ET JURIDICTION:

Avec l'acceptation de la marchandise et la signature du bon de livraison correspondant, nos conditions générales de vente sont considérées comme acceptées sans réserve. Tout accord contraire est nul; pour toute contestation le tribunal de Rome est compétent.

CONDITIONS DE TRANSPORT:

Les frais de port seront définis en fonction de la zone et seront indiqués dans le devis et dans la confirmation de commande.

N.B. Le contrôle des tops en marbre et en verre doit être effectué à la livraison. Les réservations ou réclamations doivent être faites sur le bon de livraison. TOUTE RÉCLAMATION ULTÉRIEURE NE SERA PAS PRISE EN CONSIDÉRATION.
